

American Humane™ Farm Program

American Humane Certified™

Laying Hens- Cage Free

Animal Welfare Standards Audit Tool

Introduction

The **American Humane Farm Program (American Humane Certified™ Animal Welfare Standards)** is the product of over 140 years of applied experience in farm animal welfare. Since its beginning in 1877, American Humane has had a long history with the humane treatment of farm animals. In its work to improve the treatment of working animals and livestock in transit, American Humane has been involved in almost every major advancement in improving the welfare of animals, including an instrumental role in the enactment of the 28 Hour Transportation Law. In 1916, the U.S. Secretary of War asked American Humane to help with the rescue of horses and other animals on the battlefields of World War I. The program that followed became American Humane Rescue program, which continues to this day to rescue and shelter animals involved in disasters throughout the country.

Given its history, it was natural that American Humane would create the first farm animal welfare audit program. In 2000, American Humane pioneered the first third party audit and certification program in the United States to encourage and support the humane treatment of animals used for food. Organized as the Free Farmed® certification program, the first **Animal Welfare Standards** were based on the Royal Society for the Prevention of Cruelty to Animals' **Welfare Standards**, the Federation of Animal Science Societies' **FASS Guide for the Care and Use of Agricultural Animals in Research and Teaching**, and the governing principles first developed by the Farm Animal Welfare Council (FAWC) known as the "Five Freedoms of Animal Welfare":

- Freedom from hunger and thirst
- Freedom from discomfort
- Freedom from pain, injury, or disease
- Freedom from fear and distress
- Freedom to express normal behaviors

Since its origins, American Humane's farm animal welfare standards have been and continue to be a living document. The standards and the audit process are continually reviewed and updated, using the expertise of the American Humane Scientific Advisory Committee. This committee of internationally renowned animal scientists and veterinarians advances new science and regularly evaluates the standards to help ensure that the American Humane Certified™ program incorporates the best and current knowledge of humane practices.

American Humane collaborates with institutions and organizations on independent research in animal behavior as well as new handling and housing applications. The program incorporates the practical, hands-on experience of farmers and ranchers, and helps ensure that new technology and knowledge from veterinarians and animal research experts are shared with producers. Third-party audits help to educate, encourage, and support producers in adopting humane practices. The program promotes clear, reasoned communication with consumers and retailers about the meaning and value of humanely raised food and the benefits not only to animals but also to people.

*Note: Please refer to Appendix C of the full **Animal Welfare Standards** for a list of additional References consulted in the development of these standards.*

Audit Scoring

Audit Process & Scoring

Each individual Audit (e.g., hatchery, grower, processing, or transportation, as applicable at specific sites and facilities) will receive its own score ("Audit Score"). For each audit item, producer will receive the maximum number of points allotted if it meets the standard, and zero points if it does not meet the standard (i.e., no partial credit). When an audit item is deemed not applicable (e.g., because it is not relevant to the type of Audit), it will be removed from the total available points in calculating the Audit Score. To be eligible for certification, producer must pass each mandatory Pass/Fail audit item and receive an Audit Score of at least 85% for each Audit.

Since not every audit item may apply to every farm, some items will be considered Not Applicable (N/A). It is necessary to remove these N/A questions from the overall count. An example of this process is provided below:

a.) Total Points Possible			b.) Total N/A's	c.) Adjusted Points Achievable	d.) Total Points Achieved	Overall Audit Percentage
Items	Value	Points	Example	Example	Example	
5	50	250		250	250	
12	25	300	1 @ 10	300	300	
21	10	210		200	190	
46	3	138	4 @ 3	126	120	
A.) Total Points Possible			B.) Total N/A's	C.) Total Points Achievable	D.) Total Points Achieved	D./C. = Overall Audit Percentage
=898			=22	= A. - B. = 898-22 = 876	=860	Example= 860/876 =98%

Step 1- Count the Total Points Possible for all items on the scored **Animal Welfare Standards Audit Tool**.

Step 2- Count the number of Total Not Applicable (N/A) audit items. Subtract the Total N/A's from the Total Points Possible for all items. This will give you the Adjusted Points Achievable for the audit.

Step 3- Count up the Total Points Achieved in the audit. These are the audit items that were in conformance.

Step 4- Divide the Total Points Achieved by the adjusted Total Points Achievable to find the Overall Audit Percentage.

Non-Conformances

All welfare issues identified with a loss of points during an audit are discussed in the exit interview by the auditor and will be described on the **Non-Conformance Report**. The **Non-Conformance Report** will list out the non-conformances found by the auditor and must be signed by both the manager and auditor. All corrective actions agreed upon at the exit interview must be corrected even if your farm receives certification.

Corrective Action Plan

If a producer receives an Audit Score of less than 100%, producer must submit a Corrective Action Plan, which details steps that the producer will take to reach 100% compliance to all relevant Animal Welfare Standards.

Completion Report

Upon implementation of any Corrective Action Plan, a Completion Report confirming implementation of the plan must be submitted for American Humane's review and approval.

The American Humane Certified™ The American Humane Farm program reserves the right to perform unannounced audits at any time during the certification period.

FARM DATA:

ALL AHC HOUSES ON-SITE:

Total No. AHC Houses On-site: _____

FOR AUDITED HOUSE ONLY:

Type of House: ☐ All Litter Barn
☐ Partially slatted Barn
☐ Multitier Aviary*

(*if appl. Manu/Model)

☐ Other as described*

(*give short description)

Type of Hens: ☐ White
☐ Brown
☐ Other as described*

(*give short description)

No. of Hens Placed in House: _____

No. Hens Currently in House: _____

Audited Floor Space (ft²): _____
(sum of ALL usable area, excl. nest)

Actual (ft²) vs. Req'd (ft²)

Littered Floor Space (ft²): _____
(i.e. the sq. footage of the usable area noted above that has litter)

Actual % vs. 15% Req'd %

Type of Nest Provided: ☐ Colony
☐ Individual

Audited Nest (ft² or No.): _____

Actual vs. Req'd

Length of Qualifying Perch
Total Linear Perch (inches): _____
Total Qual. Floor Edge (inches): _____

Actual (in) vs. 6.0 in Req'd (in)

% elevated at least 16 inches: _____
Actual (%) vs. 20% Req'd (%)

Other Notes: _____
(enter ONLY if needed)

Date of Population: _____

Date for De-Population: _____

Conv. or Organic? ☐ Conventional
☐ Organic

Type of Outside Access, if Provided: ☐ N/A- not prov.
☐ Outdoor Run
☐ Other*

(*give short description)

Total Available Outside Space (ft²): _____
(Only if applicable) ft² per hen

Is Outside Access Rotated? ☐ No
☐ Yes*

(*If yes, give brief description of area available at any time, e.g. "1/2 rotation")

Type of Feeder: ☐ Trough-style
☐ Pan
☐ Other OR Mix

Length OR No. of Feeders (inches or No.)

Double-sided Trough: _____
Single-sided Trough: _____

Perimeter/Round: _____

No. of Feeders*: _____
(*ONLY if needed, e.g. "52 feeder pans")

Actual vs. Req'd

Type of Waterer: ☐ Nipple
☐ Trough
☐ Other OR Mix

No. of Nipples (No.): _____
No. of Waterers* (No.): _____
(*ONLY if needed, e.g. "362 bells")

Actual vs. Req'd

Final Disposition of Spent Hens: ☐ On-Site Euthanasia
☐ Transport/ Humane Slaughter
☐ Other*

(Optional) Name of Marketing or Producer Group if under Forward Contract: _____

List any Quality Assurance Programs Routinely Implemented: _____

Audit Notes

- *The American Humane Certified™ standards are written to cover facilities in varying geographic and temperature regions and facilities utilizing different systems. Therefore, not all sections in these standards apply to every facility. Farmers must comply with any local, state or federal mandates for handling and processing eggs that affect the environment or safety of their product.*
- *Egg Producers have the ability to receive dual certification through the American Humane Certified program and the United Egg Producers (UEP) program by passing this audit. For the specific UEP requirements, refer to the UEP.*
- *If an outside company is used for other processes such as vaccinations, end-of flock disposition, etc., auditors must verify this process by observing the practices being conducted. If this is not a viable option for the site, then the company needs to be able to show documentation that the individuals are properly trained in these areas. This can be accomplished through training documents and/or the Certificate of Conformances.*
- *If the auditor observes willful acts of abuse or neglect towards the birds during the course of the audit, s/he must suspend the audit and notify the manager, their audit company, and the American Humane Certified program immediately. Auditor note: unless noted otherwise, for each audit item, select all boxes that apply regardless of whether the audit item is marked “Yes” or “No.” For any audit item marked “No”, provide reasons in the “Notes” section.*
- *A Certificate of Conformance (COC) is a document signed or otherwise authenticated by an individual certifying the degree to which terms or services meet specified requirements. A COC may be required when third parties, for example, are used for tasks like loading.*

Office Records/ Management

A high degree of caring and responsible husbandry is vital to help ensure good animal welfare. Managers and stockpersons must be thoroughly trained, skilled, and competent in animal husbandry and welfare. They must have a good working knowledge of their system and the hens under their care.

*The following records and documentation must be made available to the auditor at the time of the audit. These are to be maintained in the form of a Farm Manual. Producers may use their own forms for records or they may use the template forms that are provided in Appendix B of the full **Animal Welfare Standards for Laying Hens- Cage Free**.*

Company Policy & Employee Code of Conduct

		Selection	Score
M1	<p>Company Policy The Company Policy must be available to all workers, in their native language. Workers must sign and date that they have been provided a copy of, and that they understand their responsibilities under, the Company Policy, which must include as a minimum:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Emphasis of the company's commitment to providing an environment that promotes high standards of animal welfare; <input type="checkbox"/> The company has implemented a "zero-tolerance" policy stating that kicking, throwing, yelling at, purposefully scaring, and other acts of abuse towards the hens or acts of neglect in the care of the hens will not be tolerated and, upon the discretion of the company, these actions are grounds for immediate dismissal; and <input type="checkbox"/> The company has implemented an animal welfare "whistle blower" policy that protects employees who report animal welfare issues. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___/25
M2	<p>Employee Code of Conduct An Employee Code of Conduct must be available to all workers, in their native language. Workers must sign and date that they have been provided a copy of, and that they understand their responsibilities under, this Code of Conduct, which must include as a minimum:</p> <ul style="list-style-type: none"> <input type="checkbox"/> All personnel are expected to handle the hens in a positive and compassionate manner at all times; <input type="checkbox"/> Each worker has the responsibility for and is expected to contribute to upholding high standards of animal welfare at all times as they perform their duties; <input type="checkbox"/> In addition to the worker's assigned duties, each also must be cognizant that the basic requirements such as adequate feed, water, lighting, ventilation, temperature control, and biosecurity must be provided to the hens all times, and corrective actions must be taken immediately and/or a supervisor must be notified if any of these basic necessities are lacking; and <input type="checkbox"/> All personnel have access to the Animal Welfare Incident Report or a similar company document or company protocol (such as an 800 number) for reporting incidences. Personnel must complete and submit this document or otherwise report whenever they observe incidents related to animal welfare that cause them concern. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___/25

M3	<p>Animal Welfare Officer Each farm must have at least one designated Animal Welfare Officer (AWO). The AWO is the individual who is responsible for ensuring the implementation of animal welfare policies and for monitoring operations to help ensure that high standards of animal welfare are being provided to the animals at all times.</p> <p>➤ Auditor note: The owner/ operator or license manager may designate him or herself as the AWO.</p> <p>➤ Auditor note: _____ Name/position of AWO</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/10</p>
-----------	--	---	---------------

Office Records & Documentation

M4	<p>Records of Production Comprehensive production records must be available for at least one year in electronic, graphic, or tabular form, recording performance parameters including but not limited to:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Animal movement logs (dates for incoming and outgoing flocks); <input type="checkbox"/> Weekly egg production and egg masses; <input type="checkbox"/> Numbers of mortalities (with reasons stated, if known); <input type="checkbox"/> Numbers of cull birds (with reasons stated); <input type="checkbox"/> Numbers of ill or injured birds (with reasons stated, if known); <input type="checkbox"/> Feed intake and drinking water consumption; and <input type="checkbox"/> Daily house temperature. <p>Check if appropriate:</p> <ul style="list-style-type: none"> <input type="checkbox"/> House recording sheets are used as source records. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/3</p>
M5	<p>Building Checklists Records must be available for at least one year for each house with the following information for all previous and current flocks in that house, including:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Total floor and tier area available, with usable area and nest area separated; <input type="checkbox"/> Total number of birds placed in the house; <input type="checkbox"/> Total numbers/ lengths and types of waterers and of feeders; <input type="checkbox"/> Target air quality parameters including ammonia; and <input type="checkbox"/> The lighting program and target light intensity. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/3</p>

M6	<p>Standard Operating Procedures (SOPs) SOPs must be available in the main office in regularly updated, comprehensive written instructions, in workers' native language, relating to daily, weekly, and monthly activities and procedures. Examples include but are not limited to:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Workers must sign and date that they understand and have been provided copies of the sections of the SOPs that are relevant to their assigned duties; <input type="checkbox"/> Twice daily inspections of flocks and facilities, and records to be kept by responsible personnel; <input type="checkbox"/> Daily inspections of equipment (especially feed and water systems), routine maintenance and cleaning, and back-up protocols as well as records to be kept by the responsible personnel; <input type="checkbox"/> Daily monitoring and recording of maximum and minimum house temperatures (unless automatically recorded); <input type="checkbox"/> Daily monitoring of ventilation settings/ rates, any necessary adjustments (where applicable), and records of monthly ammonia readings; <input type="checkbox"/> Description of lighting program, including quarterly readings of light intensity; <input type="checkbox"/> Any additional procedures to maintain compliance with any applicable local, state, and federal regulations; <input type="checkbox"/> Any biosecurity protocols (e.g. maintaining screens, checking rodent bait, etc.); <input type="checkbox"/> Maintenance and testing of auxiliary power supply; <input type="checkbox"/> Maintenance and testing of alarm systems; and <input type="checkbox"/> Maintenance and testing of automatic ventilation systems. <input type="checkbox"/> If young laying hens are not granted continuous access to the litter area after being placed in the laying house, then the SOP must state that: <ul style="list-style-type: none"> • Housing doors are opened every day within 6 hours of the onset of the light period. • Young laying hens will be provided with continuous access to the laying area when 50% production is reached, but will not be confined overnight for more than four weeks after they are placed, whichever comes first. <p>Note: SOPs for specific operations, where applicable, are noted later in the standards:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Handling/ End-of-Flock Disposition & Transportation SOPs. <p>➤ <i>Auditor note: mark "Yes" if SOPs for miscellaneous activities and procedures are available; mark "No" if they are not.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/10</p>
----	---	---	---------------

<p>M7</p>	<p>Emergency Response Plan The Emergency Response Plan must be available at the main office. This plan includes:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Emergency information and numbers, i.e. relevant information for responders about the site as needed, contact numbers for fire department, local utilities, etc.; <input type="checkbox"/> Procedures to help ensure that responsible individuals (and alternates, if necessary) can be notified. This should include primary and alternate contact numbers for these individual(s) responsible for reacting to emergencies, i.e. farm workers/ managers, family members, and/or owner as appropriate. <i>Note: it is recommended to provide contact numbers for at least three responsible workers and/or family members when possible, and a predefined calling schedule to help ensure that all responsible parties may be contacted if necessary;</i> and <input type="checkbox"/> Contingency plans and precautions to cope with severe events/ emergencies in order to safeguard the welfare of the birds, and the procedures to be followed by responsible personnel in these occurrences or by those discovering an emergency such as fire, floods, storms or other severe weather, interruption of power or water, interruption of supplies, etc. <ul style="list-style-type: none"> • <u>Auditor note:</u> When barns are not located on the same property as the main office, Emergency Contact Information or the Emergency Response Plan must also be posted on the barn site. See E4. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
------------------	--	--	---------------

Animal Health Plan

M8	<p>Animal Health Plan A written Animal Health Plan (AHP) must be available at the main office. This plan must include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Certification or proof that the AHP has been developed in consultation with the flock veterinarian: <ul style="list-style-type: none"> ○ The flock veterinarian must sign and date the AHP; and ○ The AHP must be regularly, at least yearly; <input type="checkbox"/> Records of vaccination protocols and any vaccinations; <input type="checkbox"/> Records of treatment protocols and any treatments, including: <input type="checkbox"/> Identification of the animal(s); <input type="checkbox"/> The type of treatment and reason for the treatment; <input type="checkbox"/> Dates of treatment; <input type="checkbox"/> The types/route of administration and quantities of medications used; <input type="checkbox"/> Details of the therapeutic use, defined as treatment, prevention and control, as allowed by current laws, of any antibiotics (including ionophores), antiparasitics, and antifungals, which includes the requirements that antibiotics, antiparasitics, and antifungals must only be used therapeutically as prescribed by the flock veterinarian; <input type="checkbox"/> Therapeutic use must be for individual animals OR for specific groups of animals only when specified by the flock veterinarian through determination that the entire group is at high risk of contracting disease; <input type="checkbox"/> Therapeutic use is in conformance with the latest edition of the FDA Judicious Use of Antimicrobials for Poultry Veterinarians and complies with withdrawal periods; <input type="checkbox"/> Records of any surgical procedures; <input type="checkbox"/> Tolerance levels for overall flock performance; <input type="checkbox"/> Causes of morbidity and mortality where known; and <input type="checkbox"/> Targets for other aspects of flock health. <input type="checkbox"/> Livestock and poultry must not be implanted or injected with any growth hormone/ growth promoter or fed antibiotics (except ionophores) or fed beta-agonists for the purpose of boosting growth or feed efficiency. <p>NOTE: Treatment must never be withheld to maintain an antibiotic-free production policy. Animals must be given appropriate treatment, including antibiotics, if prescribed by the flock veterinarian, regardless of antibiotic-free production policy.</p>	<p>○ Yes ○ No ○ N/A</p>	<p>___/25</p>
M9	<p>Flock Performance Parameters Flock Performance Parameters must be continuously monitored for indicators of disease common to laying hens or to production disorders.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Monitoring of flock performance parameters must include review of records of observations made during daily inspections, and the monitoring of specific health conditions by stockpersons and by the flock veterinarian. <input type="checkbox"/> If any flock performance parameter falls below the tolerance limits identified in the AHP, the veterinarian or properly trained personnel must be informed and a program of action developed to remedy the problem, as defined in the AHP. Rates of inspections must be increased until flock performance parameters return to acceptable limits. 	<p>○ Yes ○ No ○ N/A</p>	<p>___/10</p>

M10	<p>Action and Management Plans in the AHP Records of any Action and Management Plans must be retained as part of the AHP, including but not limited to:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Procedures to be followed in the event of an outbreak of abnormal behavior such as feather-pecking or cannibalism, including appropriate and immediate changes in the system of management; <input type="checkbox"/> Management plans for the prevention of suffering from injuries, especially keel bone breaks, which include: <ul style="list-style-type: none"> <input type="checkbox"/> the monitoring and assessment of daily inspection logs for culls to help ensure that an increasing problem is not developing, and where found, <input type="checkbox"/> recommendations and guidance from the flock veterinarian to alleviate/ prevent such instances; <input type="checkbox"/> Action plans for the mitigation/ prevention of recurring injuries seen in a number of birds to suggest that there is a common cause and that is attributable to physical features of the environment or to handling procedures. (<i>Injury is described as damage severe enough for the formation of granular scar tissue or defective bones or joints, and to an extent significantly greater than would be caused by accidental bumps or scratches. Attention must be paid to foot lesions.</i>); <input type="checkbox"/> Management plans/ practical measures for the prevention and control of external and internal parasitic infestations; <input type="checkbox"/> The program adopted and followed for the reduction and control of organisms that cause food safety concerns (such as Salmonella). 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___ /10
-----	--	---	---------

Nutrition & Lighting Plans

M11	<p>Nutrition Plan A Nutrition Plan must be available at the main office. This plan must include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Certification or proof that the diet has been developed in consultation with a qualified flock nutritionist or the flock veterinarian: <ul style="list-style-type: none"> <input type="checkbox"/> The flock nutritionist/veterinarian must be identified by name. <input type="checkbox"/> The plan must be reviewed periodically and updated. <input type="checkbox"/> Demonstration that the diet conforms to the following requirements (such as a letter from the flock nutritionist/veterinarian or other evidence that confirms the following): <ul style="list-style-type: none"> <input type="checkbox"/> The diet has been developed in accordance with guidelines provided by the most recently published National Research Council (NRC) standards; <input type="checkbox"/> Growth hormones/ growth promoters are not used as additives to the feed in the <u>stated formulation</u> for the <u>stated producer</u>; and <input type="checkbox"/> In-feed antibiotics or anti-parasitic agents are not used in the <u>stated formulation</u> for the <u>stated producer</u>, except and unless for therapeutic reasons as prescribed by an attending veterinarian and as documented in the Animal Health Plan. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___ /10
-----	--	---	---------

M12	<p>The Nutrition Plan must also include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Specifications for a diet that is adjusted as appropriate to the hens' age and species/strain in order to promote balanced nutrition. <ul style="list-style-type: none"> <input type="checkbox"/> Changes to the diet must be introduced gradually. <input type="checkbox"/> Feed intake of the hens must be monitored when changing feed type to help ensure that the hens do not lose weight. <input type="checkbox"/> The diet must include mineral supplements, including coarse calcium, which are provided in adequate quantity to sustain healthy bone strength for the laying hens. <input type="checkbox"/> Hens with outdoor access must be provided with insoluble grit (composed of granite, quartz, or silica sand) at least once weekly to assist in digestion. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M13	<p>The Nutrition Plan must also include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Feed records that have been retained for at least one year, including: <ul style="list-style-type: none"> <input type="checkbox"/> Identification of feed mills and whether a major or minor source of feed; <input type="checkbox"/> Feed constituents/ feed concentrates (minerals/amino acids, etc.) used at each site. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M14	<p>Lighting Program</p> <p>The lighting system in houses must be designed and maintained to regulate a daily cycle for all hens. The lighting program for each house must be documented and light intensity must be tested quarterly with records on file. The lighting program must provide within each 24-hour period:</p> <ul style="list-style-type: none"> <input type="checkbox"/> A minimum continuous period of 8 hours of daytime light. <ul style="list-style-type: none"> ○ The daytime light levels must be an average minimum of 10 lux (1 foot-candle) at the head height of the hens throughout the house, excluding areas in the shade of equipment. ○ Patches of high intensity sunlight or artificial light must be avoided. <input type="checkbox"/> A minimum period of 6 hours of continual darkness or the natural period of darkness, if less. (<i>Note: 'Darkness' refers to the substantial dimming of lighting to allow birds to rest.</i>) <p>➤ <u>Auditor note:</u> Lighting and light intensity must also be evaluated on-site. See E17-E19.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /25</p>

Biosecurity & Sanitation Plans

M15	<p>Biosecurity Plan, Structural /Access The structural biosecurity plan must be available and include as a minimum:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Description of and maintenance schedule for physical methods for discouraging pests, predators, and wild birds. <input type="checkbox"/> Description of company biosecurity policies and procedures for employees; <input type="checkbox"/> Description of the policies and procedures for the deterrence of unapproved visitors; and <input type="checkbox"/> Descriptions of the policies and procedures for approved visitors including the logging of all approved visitors. Non-farm personnel are not permitted on the site unless approved by farm managers, and unless appropriate precautions have been taken, including compliance with the company policy on “downtime” i.e. time away from contact with other poultry. <p>➤ <i>Auditor note: The implementation of the structural biosecurity policies and procedures must be evaluated on-site. See E2.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M16	<p>Biosecurity Plan, Operational The operational biosecurity plan must be available and include as a minimum:</p> <ul style="list-style-type: none"> <input type="checkbox"/> The maintenance of outdoor areas adjacent to surrounding buildings to keep vegetation short and tidy within at least 24” from the house (i.e. removing vegetation that provides shelter to pests and predators); <input type="checkbox"/> Descriptions of policies and procedures for the deterrence and control of pests and predators, maintenance schedules and personnel responsible for baiting and trapping, etc.; <input type="checkbox"/> The removal of feed sources and the protection of bulk feed and water supplies to reduce the attraction of pests, rodents, mold, etc.; <input type="checkbox"/> The protocols for personnel working with older flocks to limit contact with pullets; and <input type="checkbox"/> The provision and maintenance of protective clothing, foot baths, and/or shower facilities for workers, where appropriate. <p>➤ <i>Auditor note: The implementation of the operational biosecurity policies and procedures must be evaluated on-site. See E3.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M17	<p>Cleaning and Sanitation Plan The Cleaning and Sanitation Plan must be available as part of the overall health plan, and must include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Details for routine/ scheduled cleaning procedures; and <input type="checkbox"/> Details for cleaning procedures between end-of-flock disposition and restocking; and <input type="checkbox"/> When recommended by the flock veterinarian, houses must be tested negative from infectious agents as specified in the Animal Health Plan. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M18	<p>Waste Disposal Plan Each farm must maintain a Waste Disposal Plan that details protocols for the safe and proper disposal of medical waste, sharps, carcasses, and other waste that poses a potential threat to animal and human health and safety.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

Specific SOPs for Pullets

M19	<input type="checkbox"/> Pullets must be reared on litter and provided with the minimum space allowance for the adult laying flock per E20, adjusted proportionately based on the pullets' current average weight versus the anticipated average weight of the adult hens. (<i>E.g. White/ lightweight pullets require at least $50\% \times 1.0 = 0.5$ square feet per pullet when the average weight of the pullet is 50% of the anticipated weight of the adult hen.</i>) <input type="checkbox"/> Feeding and watering systems for pullets must be similar to those in the laying house. <input type="checkbox"/> Auditors must be given access to company owned rearing houses during the audit, where applicable. <i>Note: See M39: Beak-Trimming Policy also.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
M20	Premises and equipment must be thoroughly disinfected and cleansed before restocking.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
M21	Elements such as perches and litter/scratch areas must be included in the facilities so pullets are prepared for the laying house environment.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

SOPs for Exterior Access

The **American Humane Certified™ Animal Welfare Standards for Laying Hens- Cage Free** provide specifications for different types of cage free production systems, including those where the birds have access to the exterior. If the production system provides the hens with access to the exterior, the following guidelines must be met.

M22	<p>Where hens have access to the outside, Exterior Access SOPs must be available and include as a minimum:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Inspection of the hens and the outdoor facilities, conducted twice daily as a minimum; <input type="checkbox"/> Maintenance of required shade and where provided screening to deter predators, rodents, and wild birds; and <input type="checkbox"/> Schedule for when hens have access to the exterior, i.e. daily procedures for opening/ closing exits from the house (pop holes): <ul style="list-style-type: none"> <input type="checkbox"/> A company policy must be available that describes the weather conditions for which the birds are provided exterior access, as well as the conditions for which the birds are secured in the house. <input type="checkbox"/> The birds must be provided access to the outdoor areas for a minimum of 8 hours daily during daylight hours, weather permitting. All exit areas must normally be open during this time, except when precluded by inclement weather conditions. <input type="checkbox"/> Protection must be provided from predators and wild birds, and birds must be closed in the house at night, when the outside temperatures are excessively cold or hot, and when other adverse weather conditions are expected. <i>Note: Under situations of high risk for avian influenza or other highly pathogenic infectious diseases, birds can remain indoors as recommended by the veterinarian.</i> <input type="checkbox"/> (Select the following if applicable) If a dust-bathing environment for hens is provided outdoors, the SOPs must describe the provision and maintenance of a suitable substrate for dust-bathing, with access allowed for at least 4 hours every day; <p>Where access is provided, outdoor runs:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Must be provided at rate appropriate for the flock population that allows for effective management of pathogenic contamination and maintenance of vegetation and/or other ground surfaces; <input type="checkbox"/> Must be provided with perimeter fences and as appropriate cover/ screening to discourage contact with predators, rodents, and wild birds; and <input type="checkbox"/> Must be provided with natural or artificial shade to accommodate the number of birds in the exterior, allowing them to spread out; <input type="checkbox"/> Must be maintained with active management to remedy damaged or sodden ground and must be managed to permit vegetation to regrow as the climate allows in order to provide an appropriate cover of living vegetation; <input type="checkbox"/> The area near the house must be carefully designed and managed to help ensure that it is well-drained to limit mud and damaged ground (<i>surfaces such as gravel should be considered in these areas</i>). <p>➤ <i>Auditor note: Where birds are provided access to the exterior, the physical condition of the exterior space must be evaluated on-site. See E28-E29.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /10</p>
-----	---	---	----------------

Catching & Handling SOPs

	Catching and Handling SOPs must be available and focus on maintaining high standards of animal welfare during end-of-flock disposition. (See “End-of-Flock Disposition” section.)	<i>Refer to “End-of-Flock Disposition” Section for Scoring</i>	- / -
--	---	---	--------------

Transportation & Processing Plant SOPs

	Transportation and Processing Plant SOPs must focus on maintaining high standards of animal welfare during loading, transport, unloading, shackling, stunning, and bleeding. (See “Transportation” and “Processing” sections.)	<i>Refer to “Transportation” and “Processing” Sections for Scoring</i>	- / -
--	--	---	--------------

Records of Stockperson Training

The continuing education of personnel who have day-to-day contact with the hens is one of the most important ways to help ensure behaviors that support and promote animal welfare. It is important to have documentation confirming personnel training in aspects of flock welfare appropriate to the level of operation.

M23	<p>Training Documentation <i>Note: applies to <u>all training</u> in this section “Records of Stockperson Training”</i></p> <p>Documentation must be available confirming that personnel are provided training at orientation, as well as yearly updates/refresher courses (and opportunities for continuing education/ professional development) and specialized training, in aspects of animal welfare appropriate to the level of operation. For all training of personnel:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Training must be presented in the workers' native language. <input type="checkbox"/> Training may include videos, manuals, classroom settings, online instruction, etc. <input type="checkbox"/> Training must include review of the company SOPs, the American Humane Certified Animal Welfare Standards, and 'hand's-on' experience and evaluations. <input type="checkbox"/> Training records must clearly define what is expected of each stockperson so that each is fully aware of their duties and responsibilities. <input type="checkbox"/> Training records must be signed by both the trainer and the trainee, and include the training topic (i.e. orientation, yearly update/refresher course, specialized training, etc.) as well as the training date. 	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	<p>___ /10</p>
M24	<p>Training for All Stockpersons Prior to being given responsibility for the welfare of the hens, all stockpersons must be properly trained. As a minimum, the training program for all stockpersons in direct contact with the hens must include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Knowledge of the normal behavior of hens and of the flock, the ability to recognize the signs of good health and welfare and the ability to identify potential problems as early as possible; <input type="checkbox"/> Knowledge of the proper way handle animals in manner that minimizes unnecessary stress to the birds; <input type="checkbox"/> Recognizing the signs of abnormal behavior and fear; <input type="checkbox"/> Recognizing deviations from normal flock activity; <input type="checkbox"/> Understanding the physical and environmental requirements for hens; <input type="checkbox"/> Possessing a basic knowledge of common diseases, illnesses, and injuries, and know when responsible personnel must be notified; <input type="checkbox"/> Understanding the factors that affect litter condition (i.e. moisture, nitrogen content, and slippery, caked litter), and identifying welfare problems associated with poor litter management (e.g. burnt hocks, paw lesions, etc.); and <input type="checkbox"/> Knowing the procedures to be followed in the event of an emergency, i.e. the Emergency Response Plan. 	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	<p>___ /10</p>

M25	<p>Specialized Training of Stockpersons Documentation must be available for the training of stockpersons to perform specialized duties, with emphasis on animal welfare, optimizing health, and minimizing pain and distress to the birds. Prior to performing procedures that have the potential to cause suffering (e.g. injections and approved beak-trimming), the stockperson must be able to demonstrate to the trainer that they are proficient in performing those procedures. Specialized training includes but is not limited to:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Specific training in the correct procedures for performing inspections of the hens; identifying which hens are to be culled/ euthanized and recognizing unusual conditions or behaviors; and the appropriate and timely remedial actions to be taken, either by the direct action of the stockperson or through the notification of the responsible personnel; <ul style="list-style-type: none"> ○ Sick hens must be treated immediately, and any hens suffering from injury such as open wounds or fractures, or from prolapse of the vent, must be segregated and treated without delay, or if necessary, humanely euthanized. <input type="checkbox"/> Specific training and certification of the stockpersons' proficiency in approved techniques for euthanasia; and <input type="checkbox"/> Specific training and orientation for stockpersons responsible for any equipment on which the hens depend, including: <ul style="list-style-type: none"> ○ recognizing normal operation of the equipment; ○ operating the equipment competently (e.g., heaters, lighting, ventilation, flaps/fans); ○ carrying out routine maintenance to help ensure that the equipment is kept in good working order; ○ recognizing common signs of malfunction; and ○ carrying out any actions in the event of failures. 	<p>○ Yes ○ No ○ N/A</p>	<p>___/10</p>
M26	<p>Training of On-Farm Crews The training of on-farm personnel, such as catching and transport or euthanasia crews, must be documented, and all members of these crews must be provided full, detailed, written instructions. Training includes Catching & Handling, Transport, and/or Euthanasia protocols.</p>	<p>○ Yes ○ No ○ N/A</p>	<p>___/10</p>
M27	<p>Training of Outside Workers The training for crews outside the producer's control (crews performing beak-trimming, vaccination crews, end-of-flock disposition crews, transport crews, etc.) must be documented to certify familiarity with and conformance to the standards herein.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Training must be validated through employee documents and/or Certificates of Conformance. <input type="checkbox"/> Outside workers must be held to the same standards of care as company employees. All outside workers must sign and date the company "Employee Code of Conduct" as described in M2, or a similar code of conduct. 	<p>○ Yes ○ No ○ N/A</p>	<p>___/10</p>

Inspections of Hens

M28	<p>Routine Inspections Records must be on file in the house for a minimum of one year showing that the hens and facilities (including outside areas, where provided) are inspected a minimum of twice daily. These records must:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Identify the person performing the inspection, and the time (AM/PM) and date of the inspection; <input type="checkbox"/> Note the numbers of mortalities with reasons stated, if known; and <input type="checkbox"/> Note the numbers of culls, with reasons stated. <p>➤ <i>The stockperson performing the inspections must proceed in a careful, deliberate manner to avoid frightening the hens unnecessarily, i.e. by making loud noises, sudden movements, etc., and must follow a path that allows them to see all of individual hens in the house.</i></p> <p>➤ <i>During inspections or at any other time, if any bird is found to be in severe pain or is suffering from severe sickness or injury then the bird must be immediately euthanized by qualified personnel.</i></p> <p>➤ <i>Mortalities found during inspections or at any other time must be removed as soon as possible after discovery and carcasses disposed of properly.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /10</p>
------------	---	---	----------------

Inspections & Maintenance of Equipment

M29	<p>Equipment Inspections Manual or automatic equipment that is essential to hen welfare, such as waterers, feeders, and fans must be inspected on a daily basis Stockpersons must also perform routine, scheduled maintenance as defined in the SOPs. Where a defect is found (whether on inspection or at any other time):</p> <ul style="list-style-type: none"> <input type="checkbox"/> It must be repaired immediately, and records must be kept of the nature of the defect and how the defect was rectified; or <input type="checkbox"/> If the defect cannot be repaired immediately, records must be kept of the nature of the defect and must show that measures as specified in the SOPs were followed in order to safeguard the hens from suffering unnecessary pain or distress as a result of the defect. Records show that these measures were maintained until the defect was repaired. <input type="checkbox"/> Routine maintenance must be performed per the equipment manufacturer's recommendations, with records kept. <input type="checkbox"/> Where used, shock wires (such as in the corners of houses) must be set to cause no more than momentary and minor discomfort to the birds. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M30	<p>Inspections of Water Systems Records must be kept showing the following:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Water availability is checked daily; <input type="checkbox"/> Water flow rate is monitored and recorded weekly and is verified using water meters or the graduated cylinder methodology; and <input type="checkbox"/> Water lines are flushed between flocks. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

M31	<p>Inspections of Auxiliary Power Supply</p> <ul style="list-style-type: none"> <input type="checkbox"/> Records must be kept showing that the auxiliary power supply (such as a standby generator), is tested weekly and- unless recommended otherwise by the manufacturer- under load, with the outcome of the test documented. <input type="checkbox"/> Records must show that the auxiliary power supply is available and has sufficient capacity to operate critical equipment such as fans, feeders, waterers, for the duration of the outage. <p>➤ <i>Auditor note: An Auxiliary Power Supply is not required at sites that rely on manually operated equipment. Where it is required, the auditor must confirm that the Auxiliary Power Supply is available on site and functional. See E11.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M32	<p>Inspections of Alarm Systems</p> <ul style="list-style-type: none"> <input type="checkbox"/> For controlled environment houses, records must be kept showing that alarm systems (audible & remote) are tested weekly, with the outcome of the test documented. <input type="checkbox"/> Records must show that these alarm systems are operational even if the principal electricity has failed. <p><i>Alarm systems for controlled environment houses must be installed and functional for giving notification in the event of an emergency (e.g. during a power failure, high temperatures, water failure, etc.)</i></p> <p>➤ <i>Auditor note: For controlled environment houses, the auditor must confirm that alarm systems are available on site and functional. See E12.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
M33	<p>Ventilation & Environmental Controls</p> <p>For controlled environment houses:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Maximum and minimum temperatures must be monitored and recorded daily. <input type="checkbox"/> Ventilation equipment must be checked daily and maintained for proper operation, with records kept. <input type="checkbox"/> Ventilation rates must be monitored daily and adjustments made in order to maintain minimum ventilation requirements and to maintain air quality parameters. <input type="checkbox"/> Documentation on ventilation system must be available that includes information on design, capacity, and CFM rating. <input type="checkbox"/> A backup plan must be in place to safeguard birds from suffering pain or distress as a result of a malfunction of the ventilation equipment. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

M34	<p>Monitoring of Ammonia Levels by Producer Records must be available showing:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Results of tests of ammonia levels, measured monthly by or on behalf of the producer at the height of the hens at multiple locations in the house, which are ideally less than 10 parts per million (ppm) but must not exceed 25 parts per million. <input type="checkbox"/> If a monthly ammonia test result was in excess of 25 ppm, records must show that a program of ammonia mitigation was implemented. Along with a description of the steps taken to reduce ammonia levels, the records must show that ammonia testing was performed daily until ammonia levels dropped below 25 ppm. <p><i>Note: Provisions must be made to help ensure that aerial contaminants do not reach a level at which they are noticeably unpleasant to a human observer. Ammonia levels are to be maintained at less than 10 ppm wherever possible.</i></p> <p>➤ <u>Auditor note:</u> Air quality and ammonia levels must be evaluated on-site on the day of the audit. See E13-E16.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/25</p>
M35	<p>Litter Maintenance Plan The SOPs and training manuals must have a section detailing proper maintenance of litter. Litter must:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Allow birds to dust bathe and forage freely; <input type="checkbox"/> Be managed and maintained in a dry, friable condition; <input type="checkbox"/> Be good quality and of a suitable material and particle size; <input type="checkbox"/> Be provided at a depth appropriate for the dilution of feces (<i>recommended to be at least 2 inches in depth of dry litter to allow birds to get to the bottom and move the litter around</i>); and <input type="checkbox"/> Be topped (fresh litter must not be placed on top of caked litter.) <p>Also:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Litter must not be wet, infested with insect pests, or otherwise harmfully contaminated; <input type="checkbox"/> Litter that is wet or otherwise contaminated must not be introduced into the house; and <input type="checkbox"/> Wet litter resulting from accidental flooding must be replaced as soon as practical. <p>➤ <u>Auditor note:</u> Litter must be evaluated on-site on the day of the audit. See E21-E22.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/3</p>

Molting Policy

M36	<p>Molting Policy Hens must not be induced to molt by withholding feed and/or water.</p> <p>➤ <u>Auditor note:</u> select only as appropriate:</p> <p><input type="checkbox"/> Flocks are not induced to molt. (If flocks are not induced to molt, select this bullet, skip remaining bullets, and mark as “Yes” to this audit item. Otherwise, leave unselected and proceed to next bullet.)</p> <p>OR</p> <p><input type="checkbox"/> Flocks are induced to molt.</p> <p><input type="checkbox"/> Methods for inducing a molt must not include the withholding of feed and/or water and must meet current recommendations for non-feed and non-water withdrawal molting per the American Veterinary Medical Association (AVMA).</p> <p><input type="checkbox"/> Records must be kept of any molting program, and must show that only methods in accordance with the AVMA were used.</p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	___ /3
M37	<p>Mortality Levels During Non-Feed/ Non-Water Withdrawal Molting If the mortality level within a house is in excess of 0.5% in 24 hours for three successive days during the non-feed/ non-water withdrawal molting, a veterinary investigation must be made to determine the cause and if necessary to remedy the problem.</p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	___ /3

Backfilling Policy

M38	<p>Flocks must not be back-filled to replace mortalities without prior approval from the American Humane Certified program.</p> <p>➤ <u>Auditor note:</u> select only as appropriate:</p> <p><input type="checkbox"/> Flocks have NOT been back-filled. (If flocks have NOT been back-filled as confirmed by a review of records, select this bullet, skip remaining bullets, and mark as “Yes” to this audit item. Otherwise, leave unselected and proceed to next bullet.)</p> <p>OR</p> <p><input type="checkbox"/> Flocks have been backfilled.</p> <p><input type="checkbox"/> Documentation is available confirming that the specific instance of back-filling was reviewed and approved by the American Humane Certified program.</p> <p><i>Note: back-filling will only be considered for approval for extreme events such as a natural disaster, disease, or other catastrophes.</i></p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	___ /3
-----	--	---	--------

Beak-Trimming Policy

M39	<p>Outbreaks of injurious feather-pecking and cannibalism are possible in cage free systems, and this harmful behavior may quickly affect a considerable proportion of the flock if not addressed.</p> <p>For this reason, though the practice of beak-trimming/tipping is undesirable, it is permitted only as a preemptive measure to mitigate the risks of injurious feather-pecking and cannibalism if beaks are left intact.</p> <p>➤ <u>Auditor note:</u> select only as applicable:</p> <p><input type="checkbox"/> Beak-trimming/tipping is NOT performed routinely on the birds, either at the hatchery, or on-site. <i>(If true, select this bullet, skip the following bullets, and mark "Yes" to this audit item. Otherwise, leave blank and proceed to the next bullets.)</i></p> <p>OR</p> <p><input type="checkbox"/> Beak-trimming/tipping is performed routinely on the birds. Where this is the case, the producer must have a Beak-Trimming Policy that states:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Beak-trimming/ tipping may only be performed where there is a concern about cannibalism. Beak-trimming/ tipping must not be performed to prevent feed wastage. <input type="checkbox"/> Where performed, the pullets' beaks should be tipped, i.e. blunted, where possible. Otherwise, beak-trimming must remove no more than 1/3 of the upper and lower beaks, as measured from the tip to the entrance to the nostrils. <input type="checkbox"/> Pullets which have been recently trimmed/ tipped must be monitored to help ensure that they are consuming adequate feed and that they are able to use the waterers. <input type="checkbox"/> Pullets that were recently trimmed/ tipped must not be exposed to other high-stress procedures such as transport or vaccination. <i>Note: it is recommended that Vitamin K and C are added to the water before and after beak-trimming, and that the hens are provided with additional feed 1 week following.</i> <input type="checkbox"/> <i>(Select only if applicable)</i> If pullets are sourced from a hatchery that performs the beak-trimming/ tipping: <ul style="list-style-type: none"> <input type="checkbox"/> Beak-trimming/ tipping must be performed within the first 24 hours of life using infrared laser equipment; and <input type="checkbox"/> Documentation must be available from the hatchery confirming that beak-trimming/ tipping was performed by trained personnel using the proper equipment and per all requirements detailed in this Beak-Trimming Policy. <input type="checkbox"/> <i>(Select only if applicable)</i> If performed on-site: <ul style="list-style-type: none"> <input type="checkbox"/> Beak-trimming/ tipping must be performed only by trained personnel using approved procedures and appropriate, well-maintained equipment. Records must be kept of: the names of the stockpersons who have undergone training for the correct beak-trimming/ tipping procedures; the name of the trainer; confirmation that the trainees' competence in performing the procedure was validated by the trainer, including proper techniques and proper use of any equipment; and the date(s) that the training occurred. <input type="checkbox"/> Beak-trimming/ tipping must be performed no later than 10 days of age by the use of a machine with a blade and cauterizer, to minimize pain and stress. <input type="checkbox"/> <u>Beak-trimming on older birds, including 'touch-up' trimming, must not be performed as a matter of course.</u> <p><i>Note: The producer should take care when selecting birds to avoid genetic strains with undesirable traits, particularly aggressiveness and a tendency to feather peck.</i></p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	<p>___/25</p>
-----	--	---	---------------

M40	<p>Action Plans for Deterring Injurious Feather-Pecking and Cannibalism</p> <p>The producer must have plans in place to discourage the spread of injurious feather-pecking and cannibalism. If outbreaks of injurious feather-pecking and cannibalism do occur:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Methods to discourage the spread of injurious feather-pecking and cannibalism must be conducted without delay. <input type="checkbox"/> Artificial appliances (such as blinkers attached to the beak or nostrils, or contact lenses) designed to stop injurious feather-pecking and cannibalism must not be used. <input type="checkbox"/> The producer must notify the American Humane Certified™ program that the problem exists and must explain the steps that the producer proposes to take in order to mitigate the problem, and the producer must provide regular updates to the American Humane Certified program regarding the success of the mitigation. <input type="checkbox"/> Methods should include removing the offending birds if they are identifiable and segregating injured birds as first steps, followed by reducing light levels and providing distractions/ enrichments to the birds and/or providing additional perches or panels so that subordinate hens can retreat. <input type="checkbox"/> If these measures still do not mitigate the problem, the producer must contact the American Humane Certified™ program for additional recommendations. <p><u>The American Humane Certified™ program will not consider beak-trimming of older birds except as a method of last resort if other measures fail.</u></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /10</p>
-----	---	---	----------------

Euthanasia Policy

M41	<p>The Euthanasia Policy includes provisions for routine euthanasia (culls), end-of-flock euthanasia, and emergency euthanasia (including mass disposal during disease outbreaks such as for highly pathogenic Avian Influenza). Euthanasia and disposal of carcasses must be consistent with applicable local, state, and federal regulations.</p> <p>A Euthanasia Policy must be available that includes provisions for humane and timely, routine and emergency, euthanasia. This policy must include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Only properly trained farm personnel or the flock veterinarian are to perform euthanasia. <input type="checkbox"/> Training records that identify: the names of the stockpersons who have undergone training; the name of the trainer; the specific method(s) of euthanasia covered in the training; confirmation that the trainees' competence in performing the procedure was validated by the trainer, including proper techniques and proper use of any equipment; and the date(s) that the training occurred. <input type="checkbox"/> Procedures stating that: <ul style="list-style-type: none"> <input type="checkbox"/> If there is any doubt as to whether euthanasia is required: the veterinarian or properly trained personnel must be called at an early stage to advise whether treatment is possible; OR <input type="checkbox"/> If the veterinarian or properly trained personnel determine that an animal is in severe, uncontrollable pain or is unable to move on its own accord, then the animal must be promptly euthanized to prevent further suffering. <input type="checkbox"/> For euthanasia methods requiring equipment: records showing that equipment has been maintained per the manufacturer's recommendations and that it is required to be stored securely, protected, and kept clean. <input type="checkbox"/> The approved methods of euthanasia that are to be used for each age group of birds and under what circumstances, i.e. for routine culling or for emergency euthanasia for flocks. These methods must be performed promptly to prevent further suffering and must comply with the latest edition of the American Veterinary Medical Association's AVMA Guidelines for the Euthanasia of Animals. <input type="checkbox"/> The farm performs one or more of the following approved methods of on-farm euthanasia (<i>select as appropriate</i>): <ul style="list-style-type: none"> <input type="checkbox"/> Cervical dislocation, to be used in an emergency or for euthanizing a very small number of birds. Cervical dislocation involves stretching the neck to dislocate the first vertebrae in the neck from the skull and cause extensive damage to the major blood vessels. <u>Use of equipment that crushes the neck rather than dislocates the spine, such as pliers, is never acceptable practice.</u> <input type="checkbox"/> Electrical stunning, immediately followed by neck cutting. <input type="checkbox"/> Appropriately sized captive bolt euthanasia. <input type="checkbox"/> Carbon dioxide, or other approved gas/ gas mixture, delivered in an appropriate container at acceptable concentrations. <input type="checkbox"/> Any other method approved by the latest edition of the AVMA Guidelines for the Euthanasia of Animals. <input type="checkbox"/> Procedures stating that the persons performing euthanasia must verify that each bird has been properly euthanized. If necessary, the same method or an alternate method must be performed immediately to help ensure that the bird does not suffer. <input type="checkbox"/> For other than routine culls, logs stating the reason for euthanasia, the date, the competent personnel performing the euthanasia, the numbers of birds euthanized, and the procedure used. <input type="checkbox"/> Routine, on-farm disposal of flocks at the end of the production cycle must meet the requirements of this section. See "End-of-Flock Disposition" section. <input type="checkbox"/> Procedures for the proper disposal of carcasses, and records of the name of the outlet through which all such carcasses are disposed, unless carcasses are disposed of on-farm, in which case records are kept of the disposal method. Disposal must meet all state, local, and/or federal regulations. <p><u>Nothing stated here is intended to discourage the prompt diagnosis and appropriate treatment of any ill or injured bird.</u></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/50</p>
-----	--	---	---------------

On-Farm/ Feed & Water

Hens must be free from unnecessary hunger, thirst and malnutrition by being provided with a wholesome diet and continuous access to fresh water and a diet that maintains full health and promotes a positive state of well-being. Feed and water must be distributed in such a way that the hens can eat and drink without undue competition.

Feed

		Selection	Score
FW1	<p>Feed Access & Feed Space</p> <p><input type="checkbox"/> The hens must be fed a wholesome diet that is fed to them in sufficient quantity to maintain them in good health and to satisfy their nutritional needs. The hens must have unrestricted, daily access to feed, except prior to end-of-flock disposition or as required by the flock veterinarian.</p> <p><input type="checkbox"/> Per each hen, there must be a minimum of: (select only as applicable)</p> <p><input type="checkbox"/> 1.5 linear inches of feed trough when double-sided straight troughs are used; and/or</p> <p><input type="checkbox"/> 3.0 linear inches of feed trough when only one side of trough is accessible; and/or</p> <p><input type="checkbox"/> 1.5 perimeter inches of circular feeder space when round pans are used.</p> <p>➤ <u>Auditor note:</u> _____ Calculated linear inches per bird (e.g. "1.51 inches DS trough")</p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	___ /50
FW2	Feed must be fresh and not left in a contaminated (i.e. moldy, wet, soiled with rodent feces, etc.) or stale condition.	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	___ /3
FW3	<p>Even Distribution of Feed</p> <p>The hens must not have to travel more than 26 feet in the house to reach feed.</p> <p><i>Note: Feed must be distributed evenly throughout the housing system to minimize competition among birds. Particular attention must be given to the provision of feed in areas frequented by subordinate hens.</i></p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> N/A</p>	___ /3

Water

FW4	<p>Water Access & Waterers</p> <p><input type="checkbox"/> The hens must have continuous access to an adequate supply of clean, fresh drinking water at all times.</p> <p><input type="checkbox"/> Waterers must be provided at the following minimum rates: (select only as applicable)</p> <ul style="list-style-type: none"> <input type="checkbox"/> 1 nipple per every 10 hens (i.e. no more than 10 hens per nipple); and/ or <input type="checkbox"/> 0.5 inches of trough space per hen when both sides of the trough are accessible; and/ or <input type="checkbox"/> 1.0 inches of trough space per hen when only one side of the trough is accessible; and/ or <input type="checkbox"/> 0.4 perimeter inches of space per hen when round drinkers are used, OR per manufacturer's specification for bell-type drinkers. <p>➤ <u>Auditor note:</u> _____ Calculated waterer per bird (e.g. "1 nipple per 9.8 birds")</p> <p><input type="checkbox"/> Waterers must be placed at optimum height (per manufacturer's guidelines) for the size and age of the birds and must be of an appropriate design.</p> <p><input type="checkbox"/> At the time of the audit, no more than 10% of waterers may be inoperable.</p> <p><i>Note: Where new drinking systems are being installed, no open water systems are to be used that allow water spillage and soaking of litter.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	<p>___ /50</p>
FW5	<p>Emergency Water Supply</p> <p>On-site provisions must be in place to provide clean, fresh water for the duration of the outage during a shut off or failure of the main water supply, including freezing conditions.</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	<p>___ /10</p>
FW6	<p>Even Distribution of Water</p> <p>The hens must not have to travel more than 26 feet to access a drinking point.</p> <p><i>The distribution of nipple or drinker lines and spacing of lines and bell drinkers must follow a regular, uniformly distributed pattern to help ensure that all birds have access. Particular attention must be given to the provision of water in areas frequented by subordinate hens.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	<p>___ /3</p>

On-Farm/ Environment

The environment must take into account their welfare needs and provide the best husbandry approaches; meet all governmental regulations; be designed to help protect them from unnecessary physical and thermal discomfort, fear, and distress; and allow them to perform their natural behaviors. All equipment and fixtures must be selected, installed, and maintained to optimize the well-being of the flock. The hens must be protected from unnecessary pain, injury, and disease and their environment must be conducive to good health.

Buildings

E1	A copy of the current American Humane Certified™ Animal Welfare Standards for Laying Hens- Cage Free must be available on-site in either written or electronic form as a reference for all stock-keepers/ workers in the facility.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
E2	Auditor Evaluation of Biosecurity, Structural/Access Structural biosecurity must be evaluated by the auditor onsite: <input type="checkbox"/> Physical methods for the deterrence of pests, predators, and wild animals must be in place. <i>(May include elements such as: perimeter fencing, overhead netting in yards, screening of drains/vents/ openings, etc.); and</i> <input type="checkbox"/> Physical methods/ controls for approved visitors and the deterrence of unapproved visitors must be in place, including: <input type="checkbox"/> Signs posted at the farm and/or house entrances that provide instructions and information for farm personnel and approved visitors regarding biosecurity procedures; <input type="checkbox"/> Property gates and/or secured houses and/or other physical methods to restrict entry; and <input type="checkbox"/> Logging of all approved visitors. <i>Non-farm personnel are not permitted on the site except by approval from farm managers, and unless appropriate precautions have been taken, including compliance with the company policy on 'downtime', i.e. time away from contact with non-farm birds.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10
E3	Auditor Evaluation of Biosecurity, Operational Operational biosecurity must be evaluated by the auditor onsite: <input type="checkbox"/> The vegetation adjacent to surrounding buildings in outdoor areas must be in a short and tidy condition within at least 24" from the house; <input type="checkbox"/> Pest control methods such as baiting and trapping must be in place and functional; <input type="checkbox"/> Bulk feed and emergency water sources must be covered and protected, and other potential attractants of pests, rodents, mold, etc. must be removed (i.e. open trash cans with food waste or other items not necessary to the operation of the house); and <input type="checkbox"/> Protective clothing, foot baths, and/ or shower facilities for workers and approved visitors must be provided, where appropriate.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10

E4	<p>Emergency Contact Information (or Emergency Response Plan) Emergency Contact Information or the Emergency Response Plan must be posted at the entrances to all houses or at an on-site central location, with the exception that emergency information may be posted at a central office or the main office if the office is <u>located on the same site</u> as the facility. This must include:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Emergency information and numbers, i.e. relevant information for the responders about the site as needed, contact number for fire department, local utilities, etc.; <input type="checkbox"/> Procedures to help ensure that responsible individuals (and alternates, if necessary) can be notified. This should include primary and alternate contact numbers for these individual(s) responsible for reacting to emergencies, i.e. farm workers/ managers, family members, and/or owner as appropriate. <i>Note: it is recommended to provide contact numbers for at least three responsible workers and/or family members when possible, and a predefined calling schedule to help ensure that all responsible parties may be contacted if necessary;</i> and <input type="checkbox"/> Contingency plans and precautions to cope with emergencies in order to safeguard the welfare of the animals, and the procedures to be followed by those discovering an emergency such as fire, floods, storms or other severe weather, interruption of power or water, etc. <p>• <i>Auditor note: If the house is located on the same property as the main office, Emergency Contact Information or the Emergency Response Plan may be posted at the main office instead of the house. See M7.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /10</p>
E5	<p>The physical environment must take into consideration the safety of the hens, including but not limited to:</p> <ul style="list-style-type: none"> <input type="checkbox"/> There must be no sharp edges, projections, protrusions, damaged partitions, etc. that are likely to cause injury or distress to the birds. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
E6	<p>Electrical equipment must be:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Inaccessible to the birds; <input type="checkbox"/> Well-insulated and properly grounded; and <input type="checkbox"/> Safeguarded from rodents. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
E7	<p>With the exception of insecticidal preservatives, the birds must have no possibility to come into contact with paints, wood preservatives, disinfectants, or other toxins.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
E8	<p>Where used, euthanasia equipment must show no obvious signs of neglect, i.e. rust, dirt and grime, and must be stored in a secure location protected from the elements.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
E9	<p>Housing and equipment must be designed so that the hens can be readily inspected during daily observations.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
E10	<ul style="list-style-type: none"> <input type="checkbox"/> The house design must allow effective cleaning to prevent the significant buildup of parasites and other pathogens. <input type="checkbox"/> Internal walls must be smooth, and constructed of a durable material capable of withstanding cleanout procedures. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

Auxiliary Power & Alarm Systems

E11	Auditor Evaluation of Auxiliary Power Supply An auxiliary power supply, such as a standby generator, must be available and functional. <ul style="list-style-type: none"> <i>Auditor note: An auxiliary power supply is not required at sites that rely on manually operated equipment. Otherwise, a stockperson must demonstrate to the auditor that the auxiliary power supply is available and functional.</i> 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10
E12	Alarm Systems For controlled environment houses, alarm systems (audible & remote) must be installed, functional, and operate even if the principal electricity has failed. <ul style="list-style-type: none"> <i>Auditor note: For controlled environment houses, a stockperson must demonstrate that the alarm systems are available and functional.</i> 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

Thermal Environment & Ventilation

E13	The hens must be maintained in a thermally comfortable environment at all times. <ul style="list-style-type: none"> <i>Auditor note: The hens must not show signs of being too cold or too hot.</i> 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10
E14	Automatic Ventilation Systems Where automatic ventilation systems are used, there must be: <ul style="list-style-type: none"> <input type="checkbox"/> An alarm that will give adequate warning of the failure of that system to function properly. The alarm must operate even if the principle electricity supply to it has failed. <input type="checkbox"/> Additional equipment or means of ventilation (whether automatic or not) which, in the event of such a failure of the ventilation system, will provide adequate ventilation so as to prevent the birds from suffering unnecessary distress as a result of the failure. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
E15	Side Curtains (select as applicable) <ul style="list-style-type: none"> <input type="checkbox"/> If automatic side curtains are installed, these must open automatically in the event of power failure or high temperature, with record of doing so. Automatic side curtains must be functional and tested. <input type="checkbox"/> If manual side curtains are installed, the SOPs must require the side curtains to be opened manually in the event of an emergency condition (high temperature, etc.) 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
E16	Auditor Measurements of Ammonia Levels Ammonia levels, measured at the height of the animals at multiple enriched colony units in the house, must ideally be less than 10 parts per million and must not exceed 25 parts per million. <ul style="list-style-type: none"> <i>Auditor note: Measure ammonia levels at the height of the hens at a minimum of 5 random locations in the house. No location may exceed 25 ppm.</i> <p> _____ Measured maximum ammonia in PPM (must be ≤ 25 ppm) _____ Average house ammonia in PPM </p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /25

Lighting

E17	<p>Auditor Evaluation of Lighting Light levels as measured by the auditor must provide an average minimum illumination of 10 lux (1 foot-candle) throughout the hen house.</p> <ul style="list-style-type: none"> <i>Auditor note: the light levels must be checked at the level of the hens at a minimum of 5 random locations throughout the house and the results averaged. Locations that are in the shade of equipment should not be included in the sampling.</i> <p>_____ Measured average light level in foot-candles</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /25</p>
E18	<p>Patches of high-intensity artificial or natural light must be avoided in a house. Artificial lights must be located throughout the house to cast light evenly.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
E19	<p>Adequate lighting, whether fixed or portable, indoors or outdoors, must be available to enable the hens to be thoroughly inspected at any time.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

Space Allowance & Density Rates

All hens must have sufficient freedom of movement to be able to stand normally, turn around, and stretch their wings without difficulty. They must have sufficient space to be able to perch or sit quietly without repeated disturbance.

E20	<p>Space Allowance in Indoor Housing For the purposes of calculating allowable hen density rates, usable floor area shall include the main floor and litter area, plus any elevated floor areas/ tiers with at least 17.7 inches (45 cm) of clear headroom underneath, but shall exclude nest areas and any outside area, if applicable.</p> <p><i>(select only as applicable)</i></p> <p><input type="checkbox"/> In a house with an all-litter floor, a minimum space allowance of 1.5 square feet per hen must be allocated to allow performance of normal behavior and the natural clustering of hens.</p> <p><input type="checkbox"/> In a partially-slatted house with a perching/roosting area over a droppings pit/belt, and for multi-tier systems, a minimum space allowance of 1.0 square foot per hen to allow performance of normal behavior. Given that these systems provide usable vertical space for the hens to access, the hens in these systems have more space to move around than those in all-litter floor systems.</p> <p>➤ <i>Auditor note:</i> _____ Calculated square feet of usable area per hen (e.g. "1.23 sf per hen")</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /50</p>
------------	--	---	----------------

Floor & Litter

E21	<p>Hens must have access at all times to a well-maintained litter/ scratch area within the house.</p> <ul style="list-style-type: none"> <input type="checkbox"/> A minimum of 15% of the total usable area of the house (excluding nest space) must be devoted to litter area. <input type="checkbox"/> Litter must be of a proper substrate to allow for dust-bathing. <input type="checkbox"/> Litter that is wet, infested with parasites, or otherwise harmfully contaminated must be immediately removed and replaced. <input type="checkbox"/> Litter that is wet or otherwise contaminated must not be introduced into the house. <p>➤ <u>Auditor note:</u> _____ Percentage of litter (ratio of litter to total usable area including litter) in house.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___ /25
E22	<p>Auditor Evaluation of Litter/ Litter Squeeze Test Litter must be maintained in a dry and friable condition. Litter quality must be evaluated by the auditor in at least three random locations.</p> <ul style="list-style-type: none"> • <u>Auditor note:</u> Litter quality must be checked at three random locations. Where litter is located near misting equipment, the top surface of the litter should be moved aside. When litter is squeezed in the hand, it should not form a clump, and there should be no free water that is released. If no free water is released and the litter crumbles easily, score "Yes" on this item, otherwise the litter is too wet, and score "No" on this item. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___ /25

Nest Areas

E23	<p>Nests must be provided to the laying hens (select and complete as applicable):</p> <ul style="list-style-type: none"> <input type="checkbox"/> If colony nests are installed: <ul style="list-style-type: none"> • Requirement: at least 9 ft²/ 100 hens (.09 ft² hen). • Actual: _____ ft²/ hen. <input type="checkbox"/> If individual nest boxes are installed: <ul style="list-style-type: none"> • Requirement: 1 nest/ 5-7 hens. • Actual: _____ nest/hen. <input type="checkbox"/> Nest boxes must provide curtains and/or dividers for privacy. <input type="checkbox"/> Nest boxes must have a floor substrate that encourages nesting behavior. The bottom can be lined with various materials including artificial grass mats, rubber mats, plastic nest pads, or litter. Wire floors or plastic-coated wire do not meet this requirement. <input type="checkbox"/> Nests must be maintained in a clean condition. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___ /50
E24	<p>Entry perches or slatted ramps must be present and in good repair to allow use of all available nests.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	___ /3

Multi-tier Systems

E25	<p>Systems are considered to be 'multi-tier' when elevated platforms are included in the usable area calculations, and when the areas of the elevated platforms are 55% or more of the area of the main floor (excluding nest). For multi-tier systems, the following standards must be followed:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Feeders and waterers must be provided at the elevated areas, at a rate proportional to the total elevated area. <input type="checkbox"/> Elevated tiers must be equipped with manure belts or must be located to reduce soiling of hens below. <input type="checkbox"/> Clear head height between tiers (i.e. distance from top of floor below to the underside of the droppings belt above) must be at least 17.7 inches (45 cm). <input type="checkbox"/> Maximum distance from top of floor to top of next tier must not exceed 39.4 inches (100 cm). <input type="checkbox"/> Tiers must be arranged so that hens do not need to descend at an angle steeper than 45 degrees from tier to tier. <input type="checkbox"/> For young laying hens <i>not</i> granted continuous access to the litter area after being placed in the laying house: <ul style="list-style-type: none"> • Housing doors must be opened every day within 6 hours of the onset of the light period. • Young laying hens must be provided with continuous access to the laying area when 50% production is reached, but must not be confined overnight for more than four weeks after they are placed, whichever comes first.* <p><i>Note: Where tiers are arranged adjacent to one another, the horizontal spacing between these adjacent tiers must be such to allow the hens to traverse the gap easily, without an increased risk of injuring themselves. Therefore, it is recommended that the horizontal spacing between adjacent tiers is less than 31.5 inches (80 cm).</i></p> <p><i>To reduce the risk of the birds injuring themselves, the system design should be modified if necessary e.g. by decreasing the spacing between adjacent tiers or by adding panels to discourage movement between adjacent tiers.</i></p> <p>*There are currently no scientific studies that support a specific time limit for temporary confinement of young laying hens when being transferred into a cage free production house. The American Humane Scientific Advisory Committee, however, considers that temporary overnight confinement of young laying hens in cage free systems at the start of the laying cycle can, if used judiciously, have a beneficial effect by enabling the young hens to learn to use the nest boxes in order to prevent problems with floor-laid eggs. Further studies may provide more clarity on this issue and, as is the case with all American Humane standards, the Scientific Advisory Committee will review new information as it becomes available.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___/10</p>
-----	---	---	---------------

Perches

E26	<p>Perches must be provided as noted:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Linear perches (such as plastic or steel dowels) must be provided. There must be at least 6 linear inches per hen. (The alighting rail immediately in front of the nest boxes may be included.) <input type="checkbox"/> Perches must be sized to allow the hens to grasp the roost effectively (from 1 to 1 ¾ inches (25 to 45 mm) in width/ diameter). <input type="checkbox"/> (Select if applicable) If the edge of an elevated floor/ tier is of an appropriate size as noted above (the hens are able to grasp the floor edge to roost effectively) then the floor edge itself may be counted towards satisfying the perch requirement. <input type="checkbox"/> Other than floor edges as noted above, perches must be elevated above the adjacent floor surface. (Note: supports for the elevated perch must lift the bottom of the perch at least 1" (2.5 cm) above the adjacent floor surface. Perch supports must be spaced to avoid excessive defecation when the hens are roosting on the perch.) <input type="checkbox"/> At least 20% of the required perches must be raised higher to allow hens to evade aggressors (16 inches (40.5 cm) to 39.4 inches (100 cm) above the adjacent floor). <input type="checkbox"/> All perches must be located at least 12 inches (30 cm) measured horizontally from the wall or from adjacent perches. <input type="checkbox"/> There must be at least 9.5 inches (24 cm) of clear height above perches with the exception of perches over internal feed troughs, which may have a minimum of 7.9 inches (20 cm) of clear head height above. Perches with reduced clearance must not exceed 50% of the total perch requirement. <input type="checkbox"/> In multi-tier systems, linear perches must be immediately accessible to the birds at the level of the elevated tiers. These linear perches must be provided at a rate proportional to the area of the elevated tier. <p>➤ <u>Auditor note:</u></p> <p>_____ Calculated linear perch per hen (e.g. "6.1 inches per hen")</p> <p><u>Note regarding phase-in period for perch space requirement: Points will be credited toward the perch space requirement if:</u></p> <ol style="list-style-type: none"> <u>By January 1, 2018, at least 4" per bird is provided and</u> <u>By January 1, 2020, at least 6" per bird is provided.</u> 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /10</p>
E27	<p>Additionally, perching surfaces must:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Have a gap of no less than 0.5 in. on either side of any perch to allow hens to grip the perches without risk of trapping their claws; <input type="checkbox"/> Be of non-slip material and shall have no sharp edges; and <input type="checkbox"/> Be of an easily cleaned, non-porous material that doesn't harbor parasites. Also, <input type="checkbox"/> If tubes are used for perches, they must be solid or capped on the ends. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

Auditor Evaluation of Exterior Access

The **American Humane Certified™ Animal Welfare Standards for Laying Hens- Cage Free** provide specifications for different types of cage free production systems, including those where birds have access to the exterior. If the production system provides the birds with access to the exterior, the following guidelines must be met.

E28	<p>Exterior Access For all types of exterior access, the following minimum guidelines must be met.</p> <p><u>Outdoor Runs (Porches/ etc.)</u> Where access is provided, outdoor runs:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Must be provided at rate appropriate for the flock population that allows for effective management of pathogenic contamination and maintenance of vegetation and/or other ground surfaces; <input type="checkbox"/> Must be provided with perimeter fences and as appropriate cover/ screening to discourage contact with predators, rodents, and wild birds; and <input type="checkbox"/> Must be provided with natural or artificial shade to accommodate the number of birds in the exterior, allowing them to spread out; <input type="checkbox"/> Must be maintained with active management to remedy damaged or sodden ground and must be managed to permit vegetation to regrow as the climate allows in order to provide an appropriate cover of living vegetation; <input type="checkbox"/> The area near the house must be carefully designed and managed to help ensure that it is well-drained to limit mud and damaged ground (<i>surfaces such as gravel should be considered in these areas</i>). <p>➤ <u>Auditor note:</u> Where birds are provided access to the exterior, the physical condition of the exterior space must be evaluated on-site.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /25</p>
E29	<p>Exit Areas to the Outside (Pop holes) Exit areas to the outside:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Must be evenly distributed across any building walls that have openings to the exterior, with a minimum of two openings. (<i>Note: for a typical long barn, exits to the exterior are not required on the short end walls. Exits should be provided on the long side walls facing the provided exterior spaces</i>); <input type="checkbox"/> Must be provided at an adequate rate to help ensure the free movement and ready, unrestricted access of birds into and out of the house and limit undue crowding of birds around the openings; and <input type="checkbox"/> Must be a minimum of 13.8 inches high by 15.8 inches wide (35 cm by 40 cm) to allow the passage of more than one hen at a time. 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /10</p>

End-of-Flock Disposition

- Auditor note: This section must be scored for all audits. If end-of flock disposition is not occurring during the time of the visit, questions in this section must be addressed through Certificates of Conformance (COCs), review of records, and/or SOP's.*

Catching & Handling SOPs

The Catching and Handling SOPs must be available and include the following protocols:

		Selection	Score
D1	Training of Catch & Loading Crews <ul style="list-style-type: none"> <input type="checkbox"/> All personnel involved in catching and handling of birds must have received proper training to verify competence and full awareness in their duties and responsibilities. <input type="checkbox"/> Managers must provide the catching staff full and detailed written instructions for catching, handling, loading, and unloading. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D2	Animal Welfare Officer An Animal Welfare Officer (AWO) must be designated and present for each flock disposition. The AWO is responsible for supervising, monitoring, and maintaining high welfare standards throughout the end-of-flock disposition process.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D3	Water and Feed Withdrawal <ul style="list-style-type: none"> <input type="checkbox"/> Hens must be provided water up to the time when catching begins. <input type="checkbox"/> Hens must be provided feed up to 1 hour prior to the time when catching begins. <input type="checkbox"/> When transported, hens must not be deprived of feed for more than 16 hours in total, including the period up to the time of processing. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /25
D4	Where possible, feeders, waterers, and other obstacles must be raised or removed from the house prior to catching to minimize the risk of bruising.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D5	Catching must take place in low lighting to minimize birds' fear reactions. <i>It is recommended that catching be done at night or early morning.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D6	Catching, Carrying, and Loading <ul style="list-style-type: none"> <input type="checkbox"/> When possible, the hens should be caught individually and supported by both hands in an upright position. <input type="checkbox"/> Where this is impractical, no more than three birds are to be carried in one hand. Birds must be held by both legs at all times, and never by the wings or the neck. <input type="checkbox"/> Birds must be handled as minimally as possible, and must be placed directly into the transport coop or the approved euthanasia receptacle within 20 seconds of being caught. <input type="checkbox"/> The catch supervisor must check that all birds are upright in the transport coop or euthanasia receptacle, that no appendages are caught in the coop or receptacle doors, and that the birds are not piled atop one another. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10
D7	<ul style="list-style-type: none"> <input type="checkbox"/> Actions must be taken to prevent the hens from injuring one another due to overcrowding/ piling. <input type="checkbox"/> Where birds are at risk for injury due to overcrowding/ piling, the house lights must be raised to allow the birds to spread out calmly and quietly, and given time to settle before catching is resumed. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

D8	Adequate, draft-free ventilation at bird height must be provided for uncaught birds up to time of loading.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D9	Access routes to the chicken house must be adequately designed and maintained to permit the safe passage of transport vehicles/ euthanasia receptacles.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D10	Unfit birds must not be transported but instead must be immediately euthanized by trained personnel.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
D11	<p>End-of-Flock Euthanasia</p> <p>For routine, on-farm disposal of flocks at the end of the production cycle using CO₂, there must additionally be full documentation of the procedure used including records for the amount of gas used. Refer to the latest UEP standards “Guidelines for Euthanasia and On-Farm Depopulation of Entire Flocks” for more information regarding required protocols and documentation in order to demonstrate full compliance with the UEP.</p> <ul style="list-style-type: none"> <i>Auditor note: This section applies only to on-farm end-of-flock euthanasia. If hens are to be transported off-site, mark “N/A” and proceed to D12.</i> 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /25
D12	<p>End-of-Flock Disposition</p> <p>Records must be kept on file for at least two years for each flock stating the method of final disposition of spent hens (e.g. euthanasia, transportation).</p> <p><input type="checkbox"/> <i>Auditor note: please verify that “Final Disposition of Spent Hens” in the “Farm Data” section is completed.</i></p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10

Transport

Animal transport systems must be designed and managed to help ensure hens are not caused unnecessary distress or discomfort. The transport and handling of hens must be kept to an absolute minimum. Personnel involved in transport must be thoroughly trained and competent to carry out the tasks required of them.

- If American Humane Certified™ companies transport their own birds, “Transport” section must be completed.
- Meat may only be eligible for certification if separate transport & processing audits are successfully completed and approved by American Humane.

Transport SOPs

The technology is now becoming available to monitor temperature and humidity on board transport vehicles. This allows drivers to take appropriate action to maintain ideal conditions for birds. American Humane encourages the use of such equipment, and will monitor the development of such technology and review its use for future inclusion in these standards.

T1	Personnel in charge of transportation and transport equipment, including non-employees, must be trained in the proper handling of hens when loading and unloading them and while in transit. This may be verified through SOPs or Certificates of Conformance (COCs).	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T2	Noise levels from all sources must be minimized as much as possible during loading, unloading, and transport.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T3	In periods of hot weather, hens must be transported at night or in the coolest part of the day or systems must be in place to provide cooling during load out of the birds.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T4	<input type="checkbox"/> The transport SOP's must address when high ambient temperature or high humidity poses a threat of heat stress to the birds during catching, loading, and unloading. <input type="checkbox"/> The SOPs must describe appropriate actions to take to reduce the risk of heat stress on the birds, including the receipt of weather forecasts of the expected temperature, supplemental ventilation, etc.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T5	Hens reared in houses with tunnel ventilation must be pre-adapted to warmer temperatures if they are transported during hot weather.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T6	The transport SOP must identify steps to be taken to shelter and protect the birds when they are transported during extreme weather.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T7	The transport SOPs must address procedures to be followed in the event of an emergency, such as an accident.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T8	Every effort must be made to help ensure journeys are completed without unnecessary delays, i.e. drivers must be aware of any potential traffic problems and plan their journey accordingly.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T9	The person supervising the catching and loading of birds must work closely and coordinate with the processing plant to minimize the time birds spend waiting on the vehicle.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
T10	If it is necessary to keep birds on a stationary vehicle, the driver must take action to avoid thermal stress to the birds.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

Processing

Processing systems must be designed and managed to help ensure that poultry are not caused unnecessary distress or discomfort. The pre-slaughter handling of hens must be kept to a minimum. Personnel involved in slaughter must be thoroughly trained and competent to carry out the tasks required of them.

- Meat may only be eligible for certification if separate transport & processing audits are successfully completed and approved by American Humane.
- Refer also to "Pass/ Fail Auditor Evaluations" items "P/F 2" & "P/F 3" below.

Processing Plant Records

		Selection	Score
P1	Records of DOAs <ul style="list-style-type: none"> <input type="checkbox"/> All transport deaths and injuries must be recorded and reported to the AWO and the farm manager before the next consignment from the same source is collected. Records must be made available to the auditor. <input type="checkbox"/> Where mortalities during transport are traced to a single cause, prompt action must be taken to prevent further deaths, injury, or suffering from occurring. <input type="checkbox"/> Average levels of transport mortality (DOAs) above 0.2% in any three-month period or above 0.5% in any 24-hour period must be investigated to determine the cause and immediate remedial actions must be implemented. Records must be available describing the remedial actions that were taken and must show that for subsequent instances of transport, DOAs were within permissible levels. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10

Processing Plant SOPs

Processing Plant SOPs must be available and include the following protocols:

P2	Animal Welfare Policy The Processing SOPs must include an Animal Welfare Policy. This policy must include written procedures with regard to maintaining welfare of the birds in the processing plant, including the responsibilities and duties of staff and emergency procedures and contingency plans. The animal welfare policy must be regularly reviewed and updated.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10
P3	Animal Welfare Officer Managers must appoint at least one trained Animal Welfare Officer (AWO), who is responsible for the implementation of the animal welfare policy. <i>A number of processing plants have installed closed circuit television (CCTV) monitors within the holding and slaughter areas. This allows those responsible for animal welfare including the AWO to help ensure that welfare standards are maintained. The installation of CCTV systems is recommended by American Humane.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /10
P4	Staff Training Managers, in conjunction with the AWO, must develop and implement a training program for all staff handling and slaughtering birds to help ensure that staff members are properly trained to carry out their duties and are competent to perform them. <input type="checkbox"/> Records of staff training must be available.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

P5	The AWO must make frequent checks throughout the day to help ensure that birds are being effectively stunned and are insensible throughout the slaughter operation. Where this is not the case, immediate remedial action must be taken.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P6	All transport coops must be examined on arrival at the slaughterhouse to identify any birds suffering from injury, heat or cold stress. Immediate action must be taken to prevent suffering and help ensure that similar occurrences are prevented.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P7	<p>The person in charge of any premises must help ensure that any bird awaiting slaughter is:</p> <p><input type="checkbox"/> Protected from direct sun and from adverse weather, i.e. wind, rain, hail, snow, etc.;</p> <p><input type="checkbox"/> Provided with adequate ventilation- temperature and humidity in the holding area and within chicken loads must be regularly monitored and controlled;</p> <p>Immediate action must be taken to remedy conditions if any birds are found to be suffering from heat or cold stress.</p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P8	The hens must be placed in a thermally comfortable holding area immediately on arrival at the processing facility.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P9	The holding area should have reduced or blue lighting, or if outdoors, it must have proper shade/protection from direct sunlight.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P10	Once birds have arrived at the premises at which they are going to be slaughtered, they must not be moved on to other premises. Standby equipment, e.g. a generator, must be available for emergency breakdowns.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P11	All hens must be slaughtered as soon as possible but no later than 10 hours after arriving at the processing facility.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

SOPs for Shackling, Stunning, and Bleeding

P12	<p>Conveyor System</p> <p>Birds must be unloaded from the coops onto the conveyor belt in a way to minimize injury and distress to the birds:</p> <p><input type="checkbox"/> The operator at the unloader must proceed slowly and is responsible for ensuring that the coop doors open properly and no birds are caught on or left in the coops.</p> <p><input type="checkbox"/> If birds are caught or left in the coops, they must be carefully removed by carrying the bird's body or by both legs.</p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P13	The shackling line must be located in a closed area, and the belt on the line must include a fence to prevent birds from falling off. Where loose birds are found they must be taken immediately to the hanging area or, if injured, immediately euthanized away from the line.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P14	Processing plant managers must ensure that sufficient personnel are employed on shackling lines at all times to help ensure due care and diligence.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P15	Personnel working on the shackling lines must be rotated frequently to avoid fatigue.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P16	Shackling teams must be thoroughly trained to handle the birds in such a way as to avoid injury.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

P17	Appropriate measures must be taken to prevent wing flapping and birds raising their heads before reaching the stunning bath, i.e. the use of a breast bar, curtains, reduction in noise, low light intensity, running a hand down the bird's back at shackling.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P18	Shackles must be of a size and type, and the slaughter line run at a speed, that permits the birds to be hung properly without causing unnecessary pain or distress.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P19	Birds must be hung on the shackles by both legs.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P20	The birds must not be suspended for more than 90 seconds before they are stunned.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P21	<p>Electrical water bath stunning or hand-operated stunning are acceptable methods of stunning:</p> <p><u>Where an electrical water stunning bath is used:</u></p> <ul style="list-style-type: none"> <input type="checkbox"/> The water bath stunner must be designed and set up to prevent birds from receiving pre-stun shocks. <input type="checkbox"/> The water bath used for stunning or euthanizing hens must be of sufficient size and depth, and the water must not overflow at the entrance. The electrode immersed in the water must extend the length of the water bath. <input type="checkbox"/> The stunning bath must be set at a height appropriate for the size and number of birds. In particular, the height must be set such that the heads of all birds make an effective contact with the water bath. <input type="checkbox"/> A current sufficient to induce insensibility in all birds prior to neck-cutting must be used. <input type="checkbox"/> The water bath must be fitted with a controller that clearly displays voltage, current, and frequency settings to accurately monitor current flow through the bath when loaded with birds. <p><u>Where hand-held electrical stunners are used:</u></p> <ul style="list-style-type: none"> <input type="checkbox"/> The birds must be restrained in a cone or on a shackle. <input type="checkbox"/> They are stunned immediately after shackling. <input type="checkbox"/> The stunning electrodes are placed carefully and firmly in the optimum position (between the ear and the eye). <input type="checkbox"/> Stunners are operated until initial wing flapping ceases, or until the legs become rigid and extended. 	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P22	All stunning and bleeding equipment must be regularly maintained, cleaned, and checked daily to help ensure that it is in proper working order. Any problems must be reported to the AWO and rectified immediately.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P23	Contingency plans must be in place to deal with occasions when unavoidable delays may occur and it is not possible to process birds. Specifically, if the slaughter line is stopped, AND if workers are able to access the birds safely, then birds between the point of shackling and the stunner must be removed and any birds that have already been stunned must be immediately and humanely slaughtered.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3
P24	All birds leaving the stunner must be checked to help ensure they have been effectively stunned. <u>Immediate remedial action must be taken</u> if this is found not to be the case.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A	___ /3

P25	<p>Staff must be trained to recognize the signs of an effective stun, and use these signs to recognize that birds have been effectively stunned or are dead.</p> <p><i>The most reliable indicator that a bird is properly stunned by the low voltage method is the electro-epileptic fit. The characteristics of this condition are:</i></p> <ul style="list-style-type: none"> • Neck arched with head directed vertically • Eyes opened • Wings held close to body • Tail turned inward • Legs rigidly extended with constant rapid body tremors <p><i>The physical condition of the electro-epileptic fits are shorter lasting and less pronounced when cardiac arrest is induced at stunning. They are followed by:</i></p> <ul style="list-style-type: none"> • Completely limp carcass • No breathing • Loss of nictitating membrane reflex • Dilated pupil • Comb pinch 	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
P26	<p><input type="checkbox"/> Carotid arteries and jugular veins must be effectively severed manually or by using automated equipment that performs a ventral cut.</p> <p><input type="checkbox"/> Each bird must be checked to help ensure that the carotid artery has been cut. This cut must be checked by the appointed member of staff who must be given sufficient time to sever the blood vessels manually, if necessary.</p> <p><i>There must be NO live birds entering the scalders. See P/F 3.</i></p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>
P27	<p>No more than 10 seconds may elapse between stunning and neck cutting.</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A </p>	<p>___ /3</p>

Pass/Fail Auditor Evaluations

➤ Auditor note: This section MUST be scored for all audits.

P/F1	<p>No Instances of Willful Acts of Abuse or Neglect Throughout the course of the audit, the auditor must not have observed any farm personnel committing willful acts of abuse or neglect, which include but are not limited to kicking, throwing, yelling at, or purposefully scaring the birds, or neglecting to provide feed, water, or health care.</p> <p>Auditor note: this item has no point value:</p> <ul style="list-style-type: none"> • A mark of “Yes” indicates that the auditor <u>did NOT observe</u> willful acts of abuse or neglect committed by farm personnel towards the birds. • A mark of “No” indicates that the auditor believes that acts of willful abuse or neglect towards the birds have been committed. The auditor must document the incident observed and s/he must inform management, their audit company, and the American Humane Certified program immediately. <p>The presence of willful acts of abuse or neglect is a severe non-conformance, and results in automatic failure of this audit.</p>	<p><input type="radio"/> Yes <input type="radio"/> No</p>	- / -
P/F2	<p><i>(Note: for audit at Processing Plant only)</i></p> <p>Absence of Live Birds in DOA Bin At the shackling area, there must be no live birds in the DOA bin.</p> <p>Auditor note: this item has no point value.</p> <ul style="list-style-type: none"> • Mark “Yes” to this item if there are NO live birds in the DOA bin. • Mark “No” to this item if live birds are observed in the DOA bin. The auditor must document the incident observed and s/he must inform management, their audit company, and the American Humane Certified™ program immediately. <p>The presence of live birds in the DOA bin is a severe non-conformance, and results in automatic failure of this audit.</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	- / -
P/F3	<p><i>(Note: for audit at Processing Plant only)</i></p> <p>Absence of Live Birds Entering Scalder There must be no live birds observed entering the scalding at any time. A “live bird” is defined as any bird missing both the automatic and the backup knife whose carotid arteries have not been effectively severed prior to the bird entering the scalding.</p> <p>Auditor note: this item has no point value.</p> <ul style="list-style-type: none"> • Mark “Yes” to this item if there are no live birds in the scalding. • Mark “No” to this item if live birds are observed in the scalding. The auditor must document the incident observed and s/he must inform management, their audit company, and the American Humane Certified™ program immediately. <p>The willful presence of live birds entering the scalding is a severe non-conformance, and results in automatic failure of this audit.</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A</p>	- / -

Audit Completion

To be signed at the end of the on-site audit:

Information in the completed *Animal Welfare Standards Audit Tool* and attached *Non-Conformance Report* and Farm Manual documentation is complete, correct, and has been verified by the auditor. All corrective actions agreed upon at the exit interview must be corrected even if the farm receives certification.

Farm Owner / Manager

Date

Auditor

Date

Auditor: _____

The following non-conformances were found during the American Humane Certified™ audit on _____. Within 10 business days, unless a variance is given, you must submit a Corrective Action Plan that includes the corrective action to be taken, and the person responsible for the correction, and the date the correction will be completed. After correction, submit a Corrective Action Completion Report with supporting documentation to the American Humane Certified™ program. Documentation may include pictures, copies of daily reports, training records, veterinary health plan adjustments, etc. Producers/ managers are encouraged to submit progress reports as corrective actions are taken. All corrections must be made within 90 days and reports should be submitted electronically.
